

## FROM NOW ON EXCELLENT!

**As part of the Central Innovation Programme for Small & Medium-Sized Enterprises, we received funding from the German Federal Ministry of Economics and Energy (BMWi) on 28 April 2020 as part of a cooperative project with the University of Stuttgart and were subsequently awarded the "Innovative through Research" seal of approval by the Stifterverband. This also makes us one of the most innovative medium-sized companies in Germany.** In a scientific selection process, the project data was evaluated in advance and the innovative success of the product development was then determined by a committee of innovation experts. Testa GmbH with its innovative, newly launched iFiD series was confirmed as a pioneer on the European and international FID market after the completion of the study.

**"Innovation" is a strong term and means for us to be a daily living, learning company and to act sustainably economically, ecologically and socially.** We are proud to think beyond borders with our entire TESTA team, to implement impulse-giving developments and to live these in our daily business. Our main focus is on the close involvement of our employees in innovation processes, the mobilisation of their performance potential and competence profiles, and the promotion of their creativity. The focus on German and European suppliers in the supply chain has proven to be an anchor of stability due to the recent development of a large-scale pandemic.

Dr. Bernhard Ulrich

Owner & General Manager
